

Oil spill treatment products approved for use in the United Kingdom

Compiled: 18 May 2010
Next review: January 2011

This list has been compiled by the Marine Management Organisation as a guide to the range of oil treatment products currently approved for use in the UK.

For further information, see
www.marinemangement.org.uk/protecting/pollution/approval.htm

How to use this list

The list is arranged, in alphabetical order, by nature of product and then by product name.

Key to the approved use column

S = Sea Test
B = Beach Test
RS = Rocky Shore Test

Key to the product nature and type column

D = dispersant
B = bio-remediation agent
S = sorbent
SC = surface cleaner
SA = sinking agent

1 = hydrocarbon solvent-based dispersant applied undiluted
2 = concentrates, diluted 1:10 with seawater before application
3 = high efficacy concentrates applied undiluted.

All products approved after 1 April 1996 have been required to pass both the Sea/Beach and Rocky Shore Toxicity Tests. Any products coming up for renewal that have only passed the Sea/Beach toxicity test in the past are required, before they can be renewed, to pass the Rocky Shore Test also. The following products have been removed from the list of approved products because they did not pass the Rocky Shore Test when submitted for renewal:

- Chemkleen OSDA JAC (removed from list 21/01/1998)
- Corexit 9527 (removed from list 30/07/1998)
- Corexit 9500 (removed from list 30/07/1998).

Existing stocks of these products may still be used away from rocky shorelines in appropriate conditions. Approval should be sought from the relevant licensing authority before any proposed use.

The following product has been found to have been on sale in the UK labelled as "Approved for use by the UK Ministry of Agriculture, Fisheries and Food" but has never been presented to our predecessor MAFF or to Defra for approval. It must therefore not be used in UK waters as an oil dispersant as it does not have official approval and has not passed any official UK efficacy or toxicity tests.

- **MOD Solvent – Marine Oil Dispersant.**
